THE VINYL ADVANTAGE

When it comes to home improvement, no project makes more sense than replacing wood or aluminum windows with all-welded vinyl ones. You can improve the appearance of your home, save window cleaning time, and reduce energy and maintenance costs – all without the burden of storm windows.

And now, Proview Vinyl Replacement Windows offer more options than ever before.

Take a look at these styles and shapes.

AWNING WINDOWS

Simple to crank and control fresh air flow, awning windows open to the outside, keeping the indoors dry even in

Awning Window

rain. A classic beveled frame surrounds 3/4" fully-welded insulated glass and a fusion-welded sash and frame provide greater structural strength. Sealed corners keep air and water out. Concealed hinges and operating hardware ensure a smooth, clean look. A full screen is standard on all vented units.

Choose from white or almond. Optional decorative grids are available in colonial and diamond styles.

SLIDER WINDOWS

These practical horizontal windows are available in 2- and 3-Lite styles. The solid vinyl frames glide smoothly, and take-out sashes mean easy cleaning. Interlocking meeting rails assure extra snugness. Virtually maintenance free, they never need painting. Choose from white or almond.

CASEMENT WINDOWS

Casement window styles range from single-vent to 5-Lite combinations of fixed and operating units, in standard white or almond. Standard full screens

come on all casement vents, mounted on the inside. Optional light or dark oak interior wood finishes are also available. Options include decorative grids in colonial and diamond styles.

Casement Window

The construction stresses energy, strength and convenience. An attractive beveled frame encloses 3/4" insulated glass. A fusion-welded frame and sash ensure greater strength and longer wear, while sealed corners keep air and water out. Concealed hinges and operating hardware ensure a smooth, clean look. The window opens a full 90° for cleaning the entire surface easily from inside.

Hopper Window

HOPPER WINDOWS

For great ventilation, security and ease of use, try hoppers. The top venting provides a comfortable air flow, while the self-contained screens remain secure. Sashes tilt in for quick, easy cleaning. Hopper windows come in white or almond. Custom sizes are available.

Garden Window

GARDEN WINDOWS

A 15 1/2" garden window depth provides a generous area for plants, picture frames, or added room space with lots of energy-efficient and maintenance-free features. For example, the roof glass panel features safety laminated glass for added protection. There is a hand-sanded 1 1/4" birch veneer surround and 7/8" insulated glass from PPG delivers maximum thermal performance. Side casement vents have conveniently

located handles for easy ventilation. A multi-point locking system and corrosion-resistant hardware enhance window security.

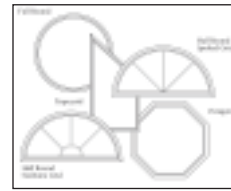

Garden windows are also available in white or almond. Options include 5/8" colonial grid, premium quality oak hardwood surround and sill muffler.

BAY & BOW WINDOWS

Vinyl Bay and Bow Windows enable you to create window seats, breakfast nooks, and other options. You can choose from a variety of styles, from 3 to 5 Lites, and you can also select double hung or casement windows to flank the middle picture. The flankers open to provide ventilation.

Bay and Bow windows arrive completely assembled, and are simple to install and customize. They come in your choice of white or almond.

PICTURE WINDOWS & SPECIALTY SHAPES

Choose from a full range of grid options and distinctive styles. We'll build to fit

your needs and specifications. All picture window and specialty shape windows are available in your choice of white or almond.

LIFETIME WARRANTY

Every Proview window comes with a transferable, limited lifetime warranty covering vinyl, glass and all working parts. This superb warranty comes with a Product ID Number for easy ordering of replacement parts. If you ever need to order parts within the warranty period, just find the ID sticker on the window and mention the Product ID Number when you call.

PROVIEW PATIO DOORS OPEN UP NEW VISTAS

Our vinyl sliding patio doors are virtually maintenance-free. And they're much more energy-efficient than wood or aluminum-frame doors. Check out the wide range of glass options and colors to complement your home.

THE 311 SLIDING PATIO DOOR

All-welded frame and panels are pre-assembled for easy installation, and an easily removable nailing fin simplifies installation. Next, the reversible panel design enables right or left door openings, while the aluminum track smoothes movement. Doors feature a 7/8" insulated Intercept sealant system

311 Sliding Patio Door

with tempered glass, and interlocking panels. The exterior handles are white enamel; interior handles are oak.

Options on the 311 include 5/8" colonial grid; 1" contoured grid; Sungate 100 or SOLARBAN60 glass; Low-E glass; Low-E glass with Argon gas and a door screen.

THE 312 SLIDING PATIO DOOR

This attractive door also offers extra security. Deluxe brass-finished hardware includes key locks and sliding panels are reinforced with steel for added durability.

In addition, a reversible panel design enables right or left door openings, and a factory-installed screen comes with every door. Interlocking panels keep air and water out.

The door frame and panels are fully welded and assembled. An easily-removable nailing fin simplifies installation.

Options on the 312 include: 5/8" and 1" contoured grids; a brass grid; Sungate 100 or SOLARBAN60 glass; Low-E glass; Low-E glass with Argon gas; Low-E glass with Azurlite or bronze tint. You can also choose from decorative glass; side lites; transoms and specialty shapes; a deluxe heavy-duty screen upgrade; and Light Natural and Dark Hillside shades of oak interior wood finish.

HIGH PERFORMANCE GLASS FROM PPG

Only high quality PPG glass is used in Proview Windows. It features the patented, warm-edge Intercept® sealant system. This system includes double glass panes separated by optimum insulating air space.

Additional high performance options include substituting PPG's Low-E Sungate100 or SOLARBAN60 glass to retain long-wave heat energy in winter and reflect long heat rays in summer. Reduce damaging ultraviolet light that can fade furniture, carpet and drapes. Argon gas is another Proview option. When this high-efficiency insulating gas replaces air between panes, it acts as an invisible blanket, decreasing outside noise and further insulating the window unit.
